Justified Killing Stephen Napier, 2026-03-18 This project argues that arguments for the permissibility of killing specifically arguments in favor of abortion and euthanasia fail to justify their conclusions At best these arguments form a merely coherent network but ultimately evince a circular pattern of justification This book traces the two principal arguments made in support of permissible abortion arguments based on a time relative interest account of wrongdoing and arguments based on the non personhood of what is killed It also addresses the principal arguments made in support of permissible euthanasia namely arguments based on the value of autonomy and compassion For each argument this book argues that it suffers from various defects The book thus concludes that arguments for abortion and euthanasia are unjustified

Autonomy and the Situated Self Rachel Haliburton, 2013-11-26 Bioethics tells a heroic story about its origins and purpose The impetus for its contemporary development can be traced to concern about widespread paternalism in medicine mistreatment of research subjects used in medical experimentation and questions about the implication of technological developments in medical practice Bioethics then began as a defender of the interests of patients and the rights of research participants and understood itself to play an important role as a critic of powerful interests in medicine and medical practice Autonomy and the Situated Self argues that as bioethics has become successful it no longer clearly lives up to these founding ideals and it offers a critique of the way in which contemporary bioethics has been co-opted by the very institutions it once sought with good reason to criticize and transform In the process it has become mainstream moved from occupying the perspective of a critical outsider to enjoying the status of a respected insider whose primary role is to defend existing institutional arrangements and its own privileged position The mainstreaming of bioethics has resulted in its domestication it is at home in the institutions it would once have viewed with skepticism and a central part of practices it would once have challenged Contemporary bioethics is increasingly dominated by a conception of autonomy that detaches the value of choice from the value of the things chosen and the central role occupied by this conception makes it difficult for the bioethicist to make ethical judgments Consequently despite its very public successes contemporary bioethics is largely failing to offer the ethical guidance it purports to be able to provide In addition to providing a critique this book offers an alternative framework that is designed to allow bioethicists to address the concerns that led to the creation of bioethics in the first place This alternative framework is oriented around a conception of autonomy that works within the ethical guidelines provided by a contemporary form of virtue ethics and which connects the value of autonomous choice to a conception of human flourishing

U.S. Supreme Court and Medical Ethics Bryan Hilliard, 2004-05-30 Few deny the impact on physicians patients and patients families of US Supreme Court decisions Actions the Court takes or refuses to take carry implications for how patients receive care the type of care they receive how medical care will be paid for the extent to which patients can trust their doctors and even how patients die Below the surface of constitutional interpretation and judicial temperament lie ethical commitments and value considerations Justices do not decide cases especially biomedical ethics cases in a vacuum Because the rulings of the Court are of such importance for medical ethics students and

health professionals must search for and evaluate theories principles and concepts the Justices may be using Not only does such a search and evaluation facilitate understanding of any particular ruling of the Court it also provides clarity and relevance to the concerns of medical ethics Too much is at stake for those involved in health care receiving services providing care or studying its moral constraints *Case Studies in Nursing Management* Ann Marriner-Tomey,1990
