

Future of Biofloc Technology in Bangladesh

With a rapidly growing population and corresponding food demand, expansion and intensification of aquaculture, [biofloc fish farming](#) is happening in Bangladesh at a fast rate. The aquaculture sector in Bangladesh is contributing to the nation's economy, assisting in poverty alleviation and supplying necessary nutrition.

However, a vast quantity of waste generation in aquaculture, extensive use of antibiotic and chemicals have become a major cause of concern for the environment as well as public health. Thus, sustainable aquaculture solutions are urgently required to increase the output without compromising the quality and the environment. Moreover, the latest innovations should reduce the aquaculture dependence on water and land and provide socio-economic support to the farming community. Biofloc technology in Bangladesh has emerged as a promising solution that can help in achieving sustainability and other objectives.
