Cities' Identity Through Architecture and Arts Nabil Mohareb, Alessio Cardaci, Sreetheran Maruthaveeran, Nicola Cavalagli, 2022-07-29 This book presents works that offer a novel interpretation of how today's urban problems can be tackled through the efficient use of resources and the modeling of solutions to best utilize the available features of cities. The second edition of this book compiles several research papers that present a detailed discussion of the formation and identification of cities and illustrate different case studies that deal with historical areas and buildings as part of preserving cities' vocabularies and self-identities. By unfolding a stimulating variety of topics in relation to the conservation of culture and identity, the book provides insights into planners and decision makers, aiding them in their contributions to the implementation of the 2030 Sustainable Development goals with reference to heritage preservation.

Structures and Architecture Paulo J. Cruz, 2016-10-14 Although the disciplines of architecture and structural engineering have both experienced their own historical development, their interaction has resulted in many fascinating and delightful structures. To take this interaction to a higher level, there is a need to stimulate the inventive and creative design of architectural structures and to persuade architects and structural engineers to further collaborate in this process, exploiting together new concepts, applications, and challenges. This set of book of abstracts and full paper searchable CD-ROM presents selected papers presented at the 3rd International Conference on Structures and Architecture Conference (ICSA2016) organized by the School of Architecture of the University of Minho, Guimarães, Portugal, July 2016, to promote the synergy in the collaboration between the disciplines of architecture and structural engineering.
