Thommai,2012-04 Fish farmers in India are attempting to optimize their use of farm resources in order to maximize their
returns The cost of fish feed and pond fertilizers in aquaculture accounts for approximately 60% of total farm expenditures
and these costs can be sharply reduced by integrating this system with other farming systems when it is appropriate to do so
Fish culture in India has undergone gradual change during the past few decades and there has recently been some
movement to integrate livestock and crop farming The benefits of integrated fish farming extend beyond improved fish
production and include an increase in the production of livestock and eggs Fodder and other horticultural crops grown on
terraced embankments of fish ponds are used to feed livestock and fish and are also consumed by farm families while the
increase in costs incurred to raise additional animals is offset by the sale of meat and eggs Apart from providing fish a mixed

Chari,H.K. Vardia,2013 Fisheries is destined to play an important role in human nutrition but the cost is beyond reach of
many people Utilization of grain and animal protein as feed in aquaculture may not be economical as it might lead to food
crisis and attention is being redirected to wider use of all resources and integrated fish farming offers a solution to the
problem To get good fish production inputs as fish feed manure and fertilizers in the pond are important aspects However at
village level introduction of these inputs is highly objected and as a result only seed as input is applied The reason for
rejection is that villagers believe that these inputs propagate skin diseases as most ponds are domestic and multipurpose in
nature To overcome the above problems and also to increase fish production recycling of nutrients is a suitable alternative To
achieve this animal component in the form of ducks was introduced into the ponds under scavenging mode in this
environment The integrated fish cum duck farming improved the economics of the fish ponds via additional income from the
