

## Search Processing Language

A Splunk search is a series of commands and arguments. Commands are chained together with a pipe “|” character to indicate that the output of one command feeds into the next command on the right.

```
search | command1 arguments1 |
command2 arguments2 | ...
```

At the start of the search pipeline, is an implied search command to retrieve events from the index. Search requests are written with keywords, quoted phrases, Boolean expressions, wildcards, field name/value pairs, and comparison expressions. The AND operator is implied between search terms. For example:

```
sourcetype=access _combined error |
top 5 uri
```

This search retrieves indexed web activity events that contain the term “error”. For those events, it returns the top 5 most common URI values.

Search commands are used to filter unwanted events, extract more information, calculate values, transform, and statistically analyze the indexed data. Think of the search results retrieved from the index as a dynamically created table. Each indexed event is a row. The field values are columns. Each search command redefines the shape of that table. For example, search commands that filter events will remove rows, search commands that extract fields will add columns.

### Time Modifiers

You can specify a time range to retrieve events inline with your search by using the `latest` and `earliest` search modifiers. The relative times are specified with a string of characters to indicate the amount of time (integer and unit) and an optional “snap to” time unit. The syntax is:

```
[+|-]<integer><unit>[@snap _ time _
unit]
```

The search `error earliest=-1d@d latest=+hh` retrieves events containing “error” that occurred yesterday snapping to the beginning of the day (00:00:00) and through to the most recent hour of today, snapping on the hour.

The snap to time unit rounds the time down. For example, if it is 11:59:00 and you snap to hours (@h), the time used is 11:00:00 not 12:00:00. You can also snap to specific days of the week using @wO for Sunday, @w1 for Monday, and so on.

### Subsearches

A subsearch runs its own search and returns the results to the parent command as the argument value. The subsearch is run first and is contained in square brackets. For example, the following search uses a subsearch to find all syslog events from the user that had the last login error:

```
sourcetype=syslog [ search login
error | return | user ]
```

### Optimizing Searches

The key to fast searching is to limit the data that needs to be pulled off disk to an absolute minimum. Then filter that data as early as possible in the search so that processing is done on the minimum data necessary.

Partition data into separate indexes, if you will rarely perform searches across multiple types of data. For example, put web data in one index, and firewall data in another.

Limit the time range to only what is needed. For example `-1h not -1w`, or `earliest=-1d`.

Search as specifically as you can. For example, `fatal _ error not *error*`

Filter out results as soon as possible before calculations. Use field-value pairs, before the first pipe. For example, `>ERROR status=404 | _ instead of >ERROR | search status=404_`. Or use filtering commands such as `where`.

Filter out unnecessary fields as soon as possible in the search.

Postpone commands that process over the entire result set (non-streaming commands) as late as possible in your search. Some of these commands are: `dedup`, `sort`, and `stats`.

Use post-processing searches in dashboards.

Use summary indexing, and report and data model acceleration features.

### Machine Learning Commands

The Machine Learning Toolkit delivers additional SPL commands that you can use to apply machine learning to your data. Find out more in the [Machine Learning Quick Reference Guide](#).

## Common Search Commands

Command	Description
<code>chart/ timechart</code>	Returns results in a tabular output for (time-series) charting.
<code>dedup</code>	Removes subsequent results that match a specified criterion.
<code>eval</code>	Calculates an expression. See COMMON EVAL FUNCTIONS.
<code>fields</code>	Removes fields from search results.
<code>head/tail</code>	Returns the first/last N results.
<code>lookup</code>	Adds field values from an external source.
<code>rename</code>	Renames a field. Use wildcards to specify multiple fields.
<code>rex</code>	Specifies regular expression named groups to extract fields.
<code>search</code>	Filters results to those that match the search expression.
<code>sort</code>	Sorts the search results by the specified fields.
<code>stats</code>	Provides statistics, grouped optionally by fields. See COMMON STATS FUNCTIONS.
<code>ststats</code>	Similar to stats but used on metrics instead of events.
<code>table</code>	Specifies fields to keep in the result set. Retains data in tabular format.
<code>top/rare</code>	Displays the most/least common values of a field.
<code>transaction</code>	Groups search results into transactions.
<code>where</code>	Filters search results using eval expressions. Used to compare two different fields.

## **Splunk User Guide Introduction**

In the digital age, access to information has become easier than ever before. The ability to download Splunk User Guide has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Splunk User Guide has opened up a world of possibilities. Downloading Splunk User Guide provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Splunk User Guide has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Splunk User Guide. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Splunk User Guide. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Splunk User Guide, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Splunk User Guide has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

Print to PDF: Many applications and operating systems have a "Print to PDF" option that allows you to save a document as a PDF file instead of printing it on paper. Online converters: There are various online tools that can convert different file types to PDF.

**How do I edit a Splunk User Guide PDF?** Editing a PDF can be done with software like Adobe Acrobat, which allows direct editing of text, images, and other elements within the PDF. Some free tools, like PDFescape or Smallpdf, also offer basic editing capabilities.

**How do I convert a Splunk User Guide PDF to another file format?** There are multiple ways to convert a PDF to another format: Use online converters like Smallpdf, Zamzar, or Adobe Acrobat's export feature to convert PDFs to formats like Word, Excel, JPEG, etc. Software like Adobe Acrobat, Microsoft Word, or other PDF editors may have options to export or save PDFs in different formats.

**How do I password-protect a Splunk User Guide PDF?** Most PDF editing software allows you to add password protection. In Adobe Acrobat, for instance, you can go to "File" -> "Properties" -> "Security" to set a password to restrict access or editing capabilities. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam: Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file?

You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs?

Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
