The Linguist, 1986 **The Incorporated Linguist**, 1986 *Sentence Generation* Yuko Sakai, 2017-04-27 Many define the language in various phrases with various modifiers as a tool of communication However not all the language is communicated and the language is generated before the communication We have no words to communicate without thinking whose concrete act is to choose the words Therefore cognition and language have the same origin We the human beings have language to recognize and dominate the world including our own mind This is the reason why we have reason and language Language is not merely a tool of communication but it is indispensable to have reason and to be a Homo sapiens The reason is based on the outside world composed of space time We perceive the outside world and recognize it by naming or classifying in our each vocabulary Accordingly a linguistic theory which explains how and why the sentences are should start with the cognition The method is opposite to that of Aristotle's tradition which begins in the form and the contents are interpreted from the form based on the view that language is a tool of communication regarding only

the communicated words as language The same view is also found in F de Saussure who regarded language as a given and socially approved system of signs Language is not a system of signs but what we generate just in the next moment If we shut up language does not exist The system or grammar may change with our usage of words moment by moment thus language continues to change as long as it is spoken Consequently this work finds the DEEP and UNIVERSAL STRUCTURE of sentence in the structure of the four dimensional cognition First we deduce what structure is necessary to express the four dimensional cognition Secondly we see how we generate the surface structures in five languages English Spanish Chinese Japanese and Ainu We define each word in syntactic tree diagrams just like chemical formulas to verify the deep structure in the surface structure

English Syntax Tree Diagram Yuko Sakai,2017-06-21 In this work we try to verify that English sentences are restricted and limited by the space time structure of cognition which may be the universal sentence structure while a sentence expresses a thought or cognition We see the reason why sentences vary in English explaining each sentence in a syntax tree diagram which is not based on form but on contents logically in sentence generation
