Government-Enterprise Connection Ming Lu,Hui Pan,2015-10-26 This book is an empirical study on the relationship between private enterprises entrepreneurs and the government in P R China The two authors conducted a detailed survey of enterprises and entrepreneurs in Liuzhou Guangxi Zhuang Autonomous Region China Although it was only conducted in a medium sized city the survey provides a rare source of information on matched entrepreneur enterprise pairs It provides detailed information on management performance enterprise government relationship as well as entrepreneurs personal information and measurements of various psychological parameters With this first hand information the authors analyzed several interesting issues concerning enterprise entrepreneur government relationships Readers will gain an understanding of the following topics Why and how does China have such special enterprise entrepreneur government relationships Do enterprises political connections in the form of entrepreneurs political status help improve the performances of these enterprises Which of the surveyed entrepreneurs could become members of the People s Congress and the People s Political Consulting Conference How do entrepreneurs feel when they are faced with greater government intervention How will China move ahead in the ongoing reform and development in the light of the enterprise entrepreneur government relationship This book examines the way in which China s enterprise entrepreneur government relationship helps enterprises develop in a transitional market In the appendix to this book one of the authors Ming Lu provides evidence based on data from listed companies that having political connections can help enterprises enter the markets of provinces other than their place of registration However this political connection also distorts the market by giving the entrepreneurs more opportunities to develop their business At the same time those entrepreneurs who face interventions from the government also shoulder greater costs in the form of loss of psychological happiness The inference of this book is that at some point in the foreseeable future China will gradually build its market system and integrate its domestic markets so that private enterprises will no longer rely so heavily on their political connections
