Cannon,2002 Since its first publication in 1996 this book has proven to be one of the most sought after and respected titles worldwide in this generic range of avian publications The author s devotion and concern for all aspects of avian health and husbandry have again been reflected in this revised edition **Guacamayos. Post-Graduate Foundation in Veterinary Science,2000 **Proceedings** ,2000 **The Complete Guide to Bird Care** David Alderton,1998 Discusses how to care for caged birds covering such topics as preparing for a bird nutrition breeding training and health and hygiene The Welfare of Domestic Fowl and Other Captive Birds Ian J. H. Duncan,Penny Hawkins,2009-12-29 Animal welfare is attracting increasing interest worldwide especially in developed countries where the knowledge and resources are available to at least potentially provide better management systems for farm animals as well as companion zoo and laboratory animals The key requirements for adequate food water a suitable environment appropriate companionship and good health are important for animals kept for all of these purposes There has been increased attention given to farm animal welfare in many co tries in recent years This derives largely from the fact that the relentless pursuit of nancial reward and ef ciency to satisfy

market demands has led to the development of intensive animal production systems that challenge the conscience of many consumers in those countries. In developing countries human survival is still a daily uncertainty so that provision for animal welfare has to be balanced against human needs. Animal welfare is usually a priority only if it supports the output of the animal, be it food, work, clothing, sport, or companionship. In principle the welfare needs of both humans and animals can be provided for in both developing and developed countries if resources are properly husbanded. In reality, however, the inequitable division of the world's riches creates physical and psychological poverty for humans and animals alike in many parts of the world.

Parrots of Africa, Madagascar and the Mascarene Islands Laubscher, Mike Perrin, 2012-12-01. A detailed examination of all aspects of parrots, from behavior to their conservation. Parrots' colour and charisma, coupled with the fact that they mimic human speech, make them fascinating to many people. They are ancient birds with unique bill and foot structures that enable them to forage on fruits in the canopy of forest trees as well as on seeds in grasslands. Because they depend on fruits and seeds all year round, most species are confined to the tropics or subtropics, where the world's biodiversity is at its greatest. There are over three hundred species of parrots, of which more than one hundred are recognized as rare, endangered, vulnerable, or threatened with extinction. Parrots are largely distributed in tropical areas of developing countries where economies are weak and uncertain and where there is great dependence on the exploitation of natural resources, particularly hardwood evergreen forests, which are preferred parrot habitats. Unfortunately, high levels of corruption are common to these regions, with much illegal trade in animals and little or no law enforcement. Collectors of parrots in the first world pay huge sums for rare parrots. However, research, education, and conservation actions are greatly reducing illegal trade in African parrots. This book provides complete coverage of all aspects of the biology of extant African, Malagasy, and Mascarene parrots and reviews our knowledge of extinct and fossil parrots from the region. Particular themes include the behavioural and ecological characteristics of parrots, their species characteristics, and conservation biology. Current concepts in avian and conservation biology are also discussed. *Parrots of Africa, Madagascar and the Mascarene Islands* is aimed at ornithologists, conservation biologists, avian ecologists, academics, bird watchers, and parrot fans alike. It is well illustrated with high quality original photographs and includes distribution maps, figures, and tables.
