IT Capability Maturity Framework™ (IT-CMFTM) 2nd edition Jim Kenneally, Marian Carcary, Martin Curley, 2016-06-15

Business organizations, both public and private, are constantly challenged to innovate and generate real value. CIOs are uniquely well positioned to seize this opportunity and adopt the role of business transformation partner, helping their organizations to grow and prosper with innovative IT-enabled products, services, and processes. To succeed in this, however, the IT function needs to manage an array of inter-related and inter-dependent disciplines focused on the generation of business value. In response to this need, the Innovation Value Institute, a cross-industry international consortium, developed the IT Capability Maturity Framework™ (IT-CMFTM). This second edition of the IT Capability Maturity Framework™ (IT-CMFTM) is a comprehensive suite of tried and tested practices, organizational assessment approaches, and improvement roadmaps covering key IT capabilities needed to optimize value and innovation in the IT function and the wider organization. It enables organizations to devise more robust strategies, make better informed decisions, and perform more effectively, efficiently, and consistently. IT-CMF is an integrated management toolkit covering 36 key capability management disciplines, with organizational maturity profiles, assessment methods, and improvement roadmaps for each. A coherent set of concepts and principles expressed in business language that can be used to guide discussions on setting goals and evaluating performance. A unifying or umbrella framework that complements other domain-specific frameworks already in use in the organization, helping to resolve conflicts between them and filling gaps in their coverage. Industry sector and vendor-independent. IT-CMF can be used in any organizational context to guide performance improvement. A rigorously developed approach underpinned by the principles of Open Innovation and guided by the Design Science Research methodology, synthesizing leading academic research with industry practitioner expertise. IT-CMF provides us with a structured and systematic approach to identify the capabilities we need, a way to assess our strengths and weaknesses, and clear pathways to improve our performance.

Suresh Kumar, Senior Executive Vice President and Chief Information Officer, BNY Mellon. To successfully respond to competitive forces, organizations need to continually review and evolve their existing IT practices, processes, and cultural norms across the entire organization. IT-CMF provides a structured framework for them to do that.
