You will be observing one or more of the following: language development; literacy behaviors; psycho-motor development; patterns and behaviors during play; time on task; interactions with adults and children; conflict resolution strategies; other behaviors as appropriate for age of child.
- Objectives: State the specific abilities you would like to observe, such as social skills, emotional self-regulation, vocabulary repertoire, attention span.
- Observations: This section contains narrative text, and perhaps tables, graphs and/or figures, reporting the results of your observations. You are not assessing or explaining what the observations mean yet. This is the **factual part of the Case Study**; you are reporting what you saw and heard.
- Conclusion: This is the qualitative section, in which you discuss **your interpretation of the results**. Some areas to be addressed in this section include: comparing the individual child to normative samples; assessing the tasks the child engaged in and the developmental appropriateness of these tasks; whether or not the child is meeting the criterion of academic standards; the specific interest areas of the child.
- Recommendations: Finally, you will make two or more suggestions to better assist the child in improving his/her skills, abilities, and progress. If you were the child's teacher, these suggestions would be provided to parents or guardians, teachers, a developmental specialist, school psychologist, other support staff, or administrators. Note: I will not provide a copy of this Case Study to anyone. Therefore, be clear and precise in this section.
