256 Turn the flywheel using tool 999 3590, until the nearest marking for exhaust valve on the camshaft is lined up between the two marks on the bearing cap. Check by the camshaft digit marking on which cylinder adjustment can be done.

257 Check that the camshaft marking, which is lined up between the marks on the bearing cap, indicates adjustment of exhaust valves. For example V5.

258 Adjust the valve yoke to zero clearance, by loosening the adjusting screw so that it does not fit up against the valve stem.

Then screw down the adjusting screw until it fits up against the valve stem and screw one further hexagon flat (60°) but do not tighten the lock nut.

IMPORTANT! When the adjusting screw is screwed down to contact with the valve stem, the yoke must at the same time be pressed down until it is in contact with the valve stems.

It is very important that the pressure is applied as close the adjusting screw as possible.
