2

2. Count and record the number of triangles and circles found on each side of the membrane.

14 Triangles and 18 Circles

3. Which shape is larger?

Triangle

4. Describe the direction of the movement of the molecules in Model 1?

Random

5. Which molecules are able to pass through the semi-permeable membrane? Justify your answer.

The Circles because they are on both sides

6. If you left this "system" for an extended period of time and then viewed it again, would you expect to find any changes in the concentrations of the molecules on either side of the membrane? Justify your answer.

There would probably be more circles on the right side because most of the circles on the left are headed in that direction. Some of the Circles might end up on the left side though due to the direction that there pointing in.
