Abstract

Email is one of the primary sources of numerous criminal activities, on the Internet, of which some threaten human lives. Email analysis is challenging due to not only various fields that can be forged by hackers or the wide range email applications in use, but also due to imposed law restrictions in the analysis of email body. Some common examples of illegitimate uses of emails are spam, phishing, cyber bullying, racial abuse, disclosure of confidential information, child pornography and sexual harassment. In the vast majority of these e-mail cybercrimes the tactics used vary from simple anonymity to impersonation and identity theft.
