

C28x IQ – Math Library

Introduction

One of the most important estimations in embedded control is the calculation of computing time for a given task. Since embedded control has to cope with these tasks in a given and fixed amount of time, we call this "Real Time Computing". And, as you know, time goes very quickly.

Therefore, one of the characteristics of a processor is the ability to do mathematical calculations in an optimal and efficient way. In recent years, the size of mathematical algorithms that have been implemented in embedded control units has increased dramatically. Just take the number of pages for the requirement specification of an electronic control unit for a passenger car:

- 1990: 50 pages,
- 2000: 3100 pages (Source: Volkswagen AG)

So, how does a processor operate with all these mathematical calculations? And, how does the processor access process data?

You know that the 'native' numbering scheme for a digital controller uses binary numbers. Unfortunately, all process values are either in the format of integer or real numbers. Depending on how a processor deals with these numbers in its translation into binary numbers, we distinguish between two basic types of processor core:

- Floating-point Processors
- Fixed-point Processors

This chapter will start with a brief comparison between the two types of processor.

Because the C28x belongs to the fixed-point type we will focus on this type more in detail. After a brief discussion about binary numbers we will have a look into the different options to use the fixed-point unit of the C28x. It can perform various types of mathematical operations in a very efficient way, using only a few machine clock cycles.

The secret behind this approach is called "IQ-Math". In case of the C28x Texas Instruments provides a library that uses the internal hardware of the C28x in the most efficient way to operate with 32bit fixed-point numbers. Taking into account that all process data usually do not exceed a resolution of 16 bits, the library gives enough headroom for advanced numerical calculations. The latest version of Texas Instruments "IQ-Math" - Library can be found with literature number "SPRC087" at www.ti.com.
