Newland – First to order the elements in a periodic table –developed the law of octaves

Meyers – Ordered elements by atomic mass but is given little credit for the current periodic table

Mendeleev – ordered elements by atomic mass and is given the most credit for the current periodic table because he left holes in his table for undiscovered elements and described their properties

Mosely – ordered elements by atomic number (modern periodic table)

2. Fill in the blanks below:

The elements in the periodic table are arranged in order of increasing Atomic
