Numerical Approaches to Combustion Modeling Elaine S. Oran, Jay P. Boris, 1991 *Municipal Solid Waste Management in Developing Countries* Sunil Kumar, 2016-11-18 This book contains detailed and structured approaches to tackling practical decision making troubles using economic consideration and analytical methods in Municipal solid waste MSW management Among all other types of environmental burdens MSW management is still a mammoth task and the worst part is that a suitable technique to curb the situation in developing countries has still not emerged Municipal Solid Waste

Management in Developing Countries will help fill this information gap based on information provided by field professionals. This information will be helpful to improve and manage solid waste systems through the application of modern management techniques. It covers all the fundamental concepts of MSWM, the various component systems such as collection, transportation, processing, and disposal, and their integration. This book also discusses various component technologies available for the treatment, processing, and disposal of MSW. Written in view of actual scenarios in developing countries, it provides knowledge to develop solutions for prolonged problems in these nations. It is mainly for undergraduate and postgraduate students, research scholars, professionals, and policy makers.

Engineering Catalysis Dmitry Murzin, 2020. With well over 90% of all processes in the industrial chemical production being of catalytic nature, catalysis is a mature though ever interesting topic. The idea of this book is to tackle various aspects of heterogeneous catalysis from the engineering point of view and go all the way from engineering of catalysis, catalyst preparation, characterization, reaction kinetics, mass transfer to catalytic reactors, and the implementation of catalysts in chemical technology. Aimed for graduate students, it is also a useful resource for professionals coming from the more academic side.
