Introduction

SAM4L devices come pre-loaded with the Atmel SAM Boot Assistant (Atmel SAM-BA®) in flash memory. This bootloader allows In-System Programming (ISP) from USB or UART host without any external programming interface.

This SAM-BA version is compatible with existing SAM-BA software tools but has some differences compared to other SAM devices. These differences are explained in this document.

This application note complements the SAM-BA user guide and explains how the SAM-BA should be used on a SAM4L design.
