Thompson, 1957 **Alternating Current Multi-Circuit Electric Machines** Valentin Asanbayev, 2015-02-13 This book details an approach for realization of the field decomposition concept The book presents the methods as well as techniques and procedures for establishing electric machine circuit loops and determining their parameters The methods developed have been realized using the models of machines with laminated and solid rotor having classical structure The use of such models are well recognized and simplifies practical implementation of the obtained results Alternating Current Bridge Methods Bernard Hague, 1923
