education technology but don't have time for in-depth professional development that would help them in their work in this area. This book fills that gap, offering guidance and inspiration to teachers of English as a Second or Other Language (ESOL) as well as to educators in other disciplines who work with multilingual learners. Organized by six key language acquisition skills—reading, writing, speaking, listening, vocabulary, and pronunciation—each chapter features eight to twelve activities to engage students and facilitate language learning. The activities are tech-driven yet flexible enough to adapt to the needs of different classroom settings. While some specific tools are discussed, the book shows teachers how to make the activities work with the technology they have available. The book includes links to ready-to-use slide decks for every activity. Offers a knowledgeable and thoughtful introduction to using AI with language learners. Features a backward design pedagogical approach in which each activity has an end goal in mind and is then developed to incorporate appropriate and effective tools. Is accompanied by the ELT Toolkit, a searchable online database of edtech tools for English language teachers hosted by TESOL International Association. Includes connections to the ISTE Standards in every chapter. Based on research-backed practices, this book's fun and practical approach will help busy teachers leverage technology to make the language learning process more fun and effective for their students. Audience: Secondary and higher ed TESOL educators and teachers working with ESL students.

Proceedings of the 5th International Conference on AI Research Renata Paola Dameri, The International Conference on AI Research (ICAIR) is becoming a key forum for academics and students whether social scientists, natural scientists, or philosophers come together to explore the future of society in the context of AI. Many aspects of AI are now the subject of peer-reviewed academic research, including the increasing use of Chatbots and GenAI in academe and in society at large. The conference was initially launched in 2019 as the European Conference on Artificial Intelligence and Robotics. After a successful inaugural event in Oxford, the conference fell victim to Covid, and the following three years were held online. Time was taken in 2023 to refocus this fast-developing area of research, and the name of the conference was changed this year to the International Conference on Artificial Intelligence. The Proceedings of the 2025 edition of the conference include academic research papers, PhD research papers, Masters Research papers, and work-in-progress papers, all of which have been presented and discussed at the ICAIR 2025 conference. The proceedings are of an academic level appropriate to a professional research audience, including graduates, postgraduates, doctoral, and post-doctoral researchers. All papers have been double-blind peer-reviewed by members of the Review Committee.
