

# Understanding Business Activity IGCSE

## Business studies

hello everyone welcome to business studies channel and today's I'll be covering understanding business activity it's a an IGCSE business topic we'll be covering the purpose and nature of business activity concepts of needs wants scarcity and opportunity cost importance of specialization purpose of business activity the concept of adding value and how added value can be increased so these are the four main topics I'll be covering in this video you will also have the option to participate in a test to examine your

knowledge first of all I will talk about the purpose of business activity so the purpose of a business is to provide both the customers with the service and goods that meets our needs and want keep that point in mind needs and wants so the purpose of a business is to meet our needs and once all businesses you see everyday in your local area their aim is to meet our demand and obviously to make profit so what are goods and services goods are things we can physically touch like cars bread water food chocolate for

example these are all goods also known as products services are intangible property something we cannot touch it but it's there for example car insurance my website or my youtube channel you can visit to learn business but you cannot physically obtain anything from it it's a service knowledge is a service so you might charge someone for sharing an idea with them Facebook is a service it is used to connect to different parties to communicate government services internet is a service so now that we can tell the

difference between goods and services will to move on to needs and want if you remember I mentioned them above so what our needs needs are things we cannot live without these are the very necessary things to aid live progress and what that means is that we need them is the most important thing in our life these are the things that are very essential in our everyday life for example water food and somewhere to live for example a house a shelter so the needs are things that are very essential for our life on the other hand once

wants are things that we don't really need to survive what would like to have a desire or a wish so things that are not really essential whereas needs are essential ones or not essential for example iPhone 10x do we really need an iPhone 10x could we survive on the not without an apple 10x yes of course we can Ferrari gold watch for example these are things that I want that we don't really need to survive our ones can be unlimited and as humans we always want to introduce and invent new things so we

also we are never really satisfied with what we want on the other hand our earth has a limited resources this results in economic problems the shortage of goods and services to produce services or goods we need resources this can be covered by factors of production there are four factors - production land capital labour enterprise I'll break down each so that you understand what each means for example land all materials and Natural Resources physical the actual physical land or extractable natural resources

as coal or oil and gas so that is what land is capital is money capital basically means money and it could
