Lipids for Functional Foods and Nutraceuticals F. D. Gunstone, 2003-01-15 Functional foods and nutraceuticals have become hot topics with an increasing number of books college courses and meetings devoted to this area of interest Foods can be regarded as functional if they can be satisfactorily demonstrated to contain bio active molecules that reduce the risk of disease or act positively to promote good health The active ingredients and components of functional foods and nutraceuticals often include lipids They are required in their own right and also for the important minor components such as carotenoids tocopherols and sterols which accompany the oils and fats This is the first book to address specifically the use of lipids in functional foods and nutraceuticals and it will be essential reading for those who produce the lipids and those who seek to incorporate them into appropriate food products The first chapter is an overview of the development of functional foods This is followed by chapters devoted to materials which are either lipids or are compounds that are fat soluble and co occur with oils and fats These include carotenoids tocopherols

phytosterols n 3 omega 3 oils diacylglycerols structured lipids sesame oil rice bran oil and oils and preparations containing palmitoleic acid y linolenic acid stearidonic acid or conjugated linoleic acid **Functional Foods II** Judith Buttriss, Michael Saltmarsh, Royal Society of Chemistry (Great Britain). Food Chemistry Group, 2000 This book fills an important gap in the published literature and as such it will be an invaluable resource for all those working on functional foods Advances in poultry nutrition Professor Todd J. Applegate, 2024-09-10 Reviews the development of novel feed sources as feed for poultry focussing on the use of essential oils macroalgae microalgae and corn fermented protein Addresses the recent advances in understanding the role of individual nutrients and additives in poultry nutrition Considers the range of methods and techniques implementable to maintain the safety of poultry feed and prevent mycotoxin contamination **Xenobiotics, Gut Microbiota, and Chronic Disease** Bei Gao, Pengcheng Tu , Ying Zhang, 2026-02-20 Mounting evidence has shown that the gut microbiota plays an essential role in human health and diseases and has been considered as therapeutic target in various chronic diseases The diversity and composition of the gut microbiota could be affected by many factors including xenobiotics which are chemicals normally not present in the environment of living organisms The xenobiotics include but not limited to dietary components food additives chemicals generated during food processing such as heterocyclic amines during cooking meet emerging environmental pollutants detected in food such as microplastics The relationship between xenobiotics and gut microbiota is bidirectional On one hand xenobiotics could influence the composition and abundance of the gut microbiota as well as the activities of microbial enzymes On the other hand the gut metagenome has a vast metabolizing potential on a range of xenobiotics in either potentially beneficial or harmful ways The interactions between xenobiotics and the gut microbiota need to be considered when developing therapeutic strategies for various chronic diseases targeting the gut microbiota This Research topic aims to fill the knowledge gap about the interactions between xenobiotics and the gut microbiota and their effects on chronic diseases such as kidney and liver diseases based on population or animal studies In particular this research topic aims to reveal the mechanistic role that gut microbiota plays in certain chronic diseases which could be either alleviated or exacerbated by xenobiotics through modulation of gut microbiota or the microbial transformation of xenobiotics The scope of this research topic includes but is not limited to the following Beneficial and harmful effects of xenobiotics on certain chronic diseases through the modulation of gut microbiota microbial metabolites or key metabolic pathways Transformation of xenobiotics by the gut microbiota which further affects the occurrence or progression of certain chronic diseases Note Topic editor Dr Ying Zhang is employed by Biomarin Pharmaceutical Inc California United States and declares no competing interests with regard to the Research Topic Subject *Report of the FAO Expert Workshop on the Application of Biosecurity Measures to Control Salmonella Contamination in Sustainable Aquaculture* ,2010 This document reviews the current scientific evidence regarding the pathogen Salmonella enterica its occurrence and survival in aquatic environment possible pathways of contamination of aquaculture systems serovars found in

seafood and salmonellosis associated with fish and fishery products The experts recognised that there are a variety of pathways reported as to how Salmonella can enter the aquaculture environment ranging from wild animals domestic stock poor sanitation and inappropriate disposal of human and animal wastes Control of such pathways poses major challenges such as land runoff during rains control of wild animals in the farm environment The experts agreed that good hygienic practices during aquaculture production and biosecurity measures can minimise but not eliminate Salmonella in products of aquaculture This report contains a series of recommendations to the national governments national competent authorities aquaculture industry and FAO
