

# Cooling Theory Lectures Notes

Markus Hupfer and members of the team!

September 7, 2024

These are the notes for the 2024 Summer Term of Cooling Theory. These are generalised and given according to preference for all of the cooling plans. Some are the generalisation while some are the lecture, the latter contribution to Cooling Theory and the book of Markus and Peter (Publications of the Engineering Office). I also used several other sources for additional material such as Part II course book of Cambridge on Cooling Theory and Thermodynamics given by Professor John White, and the other course notes from a Cambridge book on Submarine Thermodynamics course given by Professor Tim Gowers. I also included some more about other's 2023 course, Applied Maths for the Phys. Mathematics. The last version of the notes is based on Mark Hupfer's course notes, "Applied Maths for the Phys. Mathematics".

All credits go to those who are not my fault.
