How to Do YouTube Keyword Research in 3 Easy Steps

Looking to grow your YouTube channel and attract more views? The "trick" is to target topics with search demand.

This is the approach that helped us grow our YouTube channel from ~10,000 to over 200,000 monthly views in around a year.

We also gained over 50,000 new subscribers in that same period.

Step #1. Map out a hierarchy of topics

Imagine that you sell phone cases online, and you're creating a new channel where you'll unbox new smartphones to attract an audience of potential customers.

Your first thought might be to go after broad topics with huge search volumes.

Step #2. Generate keyword ideas and find search volumes

Next, use keyword research tools to find what people are searching for in relation to your list of topics.

There are a lot of keyword research tools out there, but most of them only show Google search volumes and not YouTube ones. These are almost entirely useless because people search on YouTube very differently to how they search on Google.

Final thoughts

Fail to target keywords with search volume, and you won't get views from YouTube search — it's as simple as that.
