

INTRODUCTION ON CANCER

• Cancer is a disease of the cells in the body. There are many kinds of cancer which arise from various types of cells. Cancer is not just one disease, but a large group of almost hundred diseases.

In other words, cancer is a disease characterized by uncontrolled, disorganized and continuous cell division. Unlike normal cells, cancer cells continue to grow and divide for their whole lives, replicating into more and more tumor-filled cells.

Cancer is a disease in which some of the body cells grow uncontrollably and spread to other parts of the body.
