Enterprise AI Shazia Sadiq,2025 This book provides perspectives and deliberations on the barriers and opportunities for Enterprise AI as well as a range of state of the art approaches that can facilitate AI adoption more widely *Recent Advances in Big Data, Machine, and Deep Learning for Precision Agriculture* Muhammad Fazal Ijaz,Marcin Wozniak,2025-12-09 Precision agriculture can be defined as applying real time reliable information to optimize the use of resources and the management of farming practices minimizing environmental impacts With the evolution of remote sensing technologies big data that must be converted to information is being generated in the agricultural sector When analysed with machine and deep learning approaches applied to remote sensing products this data has been used successfully The computational power using cloud based systems and recent advances in farm machinery equipment providing data collection processing and analysis opens several opportunities to develop and adopt new technologies Large scale farm precision

experimentation conducted in partnership with commercial farms and the appearance of new sensors on board UAVs crop duster airplanes and satellites such as radar technologies that allow daily remote data collection under cloudy skies are exciting and require more investigation In addition new equipment and sensors are enabling improved crop monitoring and land use mapping on a regional scale Recent advances in imaging and information technology have led to the massive production of digital images of plant specimens and living plants worldwide Computer vision and machine learning approaches are up and coming technologies to investigate and interpret digitized images of wild and domesticated taxa Deep learning technologies have been recently shown to achieve impressive performance on a variety of predictive tasks such as automated species identification trait detection and organ counting measurement and recognition The objective of this Research Topic is to explore how big data machine and deep learning algorithms are being applied to precision agriculture and plant health This topic will investigate how these tools could be used and improved in the future to aid food security mainly involving the integration of state of the art technologies We hope to increase the recognition and accessibility of AI ML tools in agricultural and plant research This Research Topic will bring together researchers from diverse fields and specializations such as plant bioinformatics computer engineering computer science agricultural engineering environmental engineering food engineering information technology and mathematics This Research Topic welcomes diverse types of articles including original research reviews and perspective papers Potential topics include but are not limited to Big data machine and deep learning for plant and fruit disease classification Features optimization for plant disease classification Classification of plant types using big data machine and deep learning Recognition of plant and fruit diseases using big data machine and deep learning On farm precision experimentation Monitoring and surveillance using hyperspectral images Monitoring crop areas Convolutional Neural Network based fruit and crop disease detection Fusion of fully connected layers for classification of plant disease Selection of optimal features for plant disease **Advances in Artificial Intelligence, Robotics, Augmented and Virtual Reality in Neurosurgery** Mohammed Ali Alvi,2024-03-18 *Cross-Modal Learning: Adaptivity, Prediction and Interaction* Jianwei Zhang,Stefan Wermter,Fuchun Sun,Changshui Zhang,Andreas K. Engel,Brigitte Röder,Xiaolan Fu,Gui Xue,2023-02-02 The purpose of this Research Topic is to reflect and discuss links between neuroscience psychology computer science and robotics with regards to the topic of cross modal learning which has in recent years emerged as a new area of interdisciplinary research The term cross modal learning refers to the synergistic synthesis of information from multiple sensory modalities such that the learning that occurs within any individual sensory modality can be enhanced with information from one or more other modalities Cross modal learning is a crucial component of adaptive behavior in a continuously changing world and examples are ubiquitous such as learning to grasp and manipulate objects learning to walk learning to read and write learning to understand language and its referents etc In all these examples visual auditory somatosensory or other modalities have to be integrated and learning must be cross modal In fact

the broad range of acquired human skills are cross modal and many of the most advanced human capabilities such as those involved in social cognition require learning from the richest combinations of cross modal information In contrast even the very best systems in Artificial Intelligence AI and robotics have taken only tiny steps in this direction Building a system that composes a global perspective from multiple distinct sources types of data and sensory modalities is a grand challenge of AI yet it is specific enough that it can be studied quite rigorously and in such detail that the prospect for deep insights into these mechanisms is quite plausible in the near term Cross modal learning is a broad interdisciplinary topic that has not yet coalesced into a single unified field Instead there are many separate fields each tackling the concerns of cross modal learning from its own perspective with currently little overlap We anticipate an accelerating trend towards integration of these areas and we intend to contribute to that integration By focusing on cross modal learning the proposed Research Topic can bring together recent progress in artificial intelligence robotics psychology and neuroscience   *Bone Cancer* Dominique Heymann,2021-09-23 Bone Cancer Bone Sarcomas and Bone Metastases From Bench to Bedside Third Edition comprehensively investigates key discoveries in the field of bone biology New aspects of bone cancer biology are treated in new chapters covering exosomes autophagy and metabolism These have led to the development of entirely new areas for investigation such as therapies which combine surgery and biological approaches The Third Edition expands on the original overview of bone cancer development physiology and pathophysiology with 40% new material Each chapter has been written by internationally recognized specialists on the bone cancer microenvironment bone metastases osteoclast biology in bone cancer proteomics bone niche circulating tumor cells and clinical trials Given the global prevalence of breast and prostate cancers knowledge of bone biology has become essential for everyone within the medical and cancer research communities Bone Cancer Bone Sarcomas and Bone Metastases From Bench to Bedside continues to offer the only translational reference to cover all aspects of primary bone cancer and bone metastases This revision opens the door to myeloma with two short chapters dedicated to this bone associated disease Covers the broad field of bone sarcomas and bone metastases from basic research to clinical approaches Presents comprehensive and translational overview of biological and clinical aspects of bone cancers discussing pathophysiology from genetic and molecular levels using the most recent evidence Provides a common language for cancer researchers bone biologists oncologists and radiologists to discuss bone tumors and how bone cancer metastases affects each major organ system Offers insights to research clinicians oncologists and radiologists into understanding the molecular basis of bone cancer leading to more well informed diagnoses and treatment of tumors and metastases Offers insights to bone biologists into how clinical observations and practices can feed back into the research cycle and therefore can contribute to the development of more targeted genomic and proteomic assays   Documentation Abstracts ,1993   **Proceedings of the Fifth Annual Conference on AI, Simulation and Planning in High Automony Systems** ,1994   *The APDAlog* ,1990   PC AI. ,1991   *Signal* ,1988   Artificial Intelligence Abstracts ,1991
