*Supply Chains* Ioannis Kostavelis, Dimitrios Folinis, Dimitrios Aidonis, Charisios Achillas, 2024-10-18 This two volume set constitutes the refereed proceedings of the 5th Olympus International Conference ICSC 2024 held in Katerini Greece during May 24-26 2024. The 51 full papers in this volume were carefully reviewed and selected from a total of 92 submissions. The primary objective of 5th Olympus ICSC is to offer an international platform for the presentation and publication of the latest scientific research findings in the field of Supply Chain Management. This conference provides valuable opportunities for delegates to exchange innovative ideas, establish research and business connections, and foster global partnerships for potential collaborations. We sincerely anticipate that this conference will significantly contribute to the advancement of knowledge in relevant scientific and academic domains.

**Proceedings of the XV International symposium Symorg 2016** Ondrej Jaško, Sanja Marinković, 2016-06-03 **Modern Trends and Research in Intermodal Transportation** Aleksander Śladkowski, 2022-01-21 This book presents a specific technical solution called intermodal transport which became the basic technological solution that made it possible to provide global interregional transport. Every day new technical, technological, and organizational solutions appear that significantly affect the further development of this industry. However, there are certain local differences between regions. In addition, an essential factor is the exchange of experience between scientists from different countries. Accordingly, the purpose of this monothematic book is to acquaint readers with the achievements of scientists dealing with this topic and living in different regions. Scientists and specialists from Poland, Germany, Great Britain, USA, Romania, Bulgaria, Russia, Italy, Kazakhstan, and Lithuania participated in the writing of individual chapters of this book. This book is intended for professionals, teachers, students, and others who are interested in new approaches to solving transport problems.

**Dynamics in chains and networks** H.J. Bremmers, S.W.F. Omta, J.H. Trienekens, 2023-08-28 Companies in food and agribusiness chains and networks are facing ever faster changes in the business environment to which they must respond through continuous innovation. Societal concerns regarding animal welfare and environmental issues have to be met in a very competitive, increasingly global environment. The growing concern of consumers regarding the quality, traceability, and environmental friendliness of products and processes call for fundamentally new ways of developing, producing, and marketing products. New ways of organizing food supply networks with new ties between firms and even between formerly separate sectors such as the health and the food sector are needed to cope with these new demands. This publication focusses on the dynamic response to these changes in chains and networks. Important topics include, among others, critical success factors for design and control of innovative chains and networks, globalization of the business environment, effects of institutional and policy change, governance structures, technologies for managing interaction, and design of information architectures for chains and networks.
