## **Game Character Creation With Blender And Unity:**

Game Character Creation with Blender and Unity Chris Totten,2012-06-01 A complete guide to creating usable realistic game characters with two powerful tools Creating viable game characters requires a combination of skills This book teaches game creators how to create usable realistic game assets using the power of an open source 3D application and a free game engine It presents a step by step approach to modeling texturing and animating a character using the popular Blender software with emphasis on low polygon modeling and an eye for using sculpting and textures and demonstrates how to bring the character into the Unity game engine Game creation is a popular and productive pursuit for both hobbyists and serious developers this guide brings together two effective tools to simplify and enhance the process Artists who are familiar with Blender or other 3D software but who lack experience with game development workflow will find this book fills important gaps in their knowledge Provides a complete tutorial on developing a game character including modeling UV unwrapping sculpting baking displacements texturing rigging animation and export Emphasizes low polygon modeling for game engines and shows how to bring the finished character into the Unity game engine Whether you re interested in a new hobby or eager to enter the field of professional game development this book offers valuable guidance to increase your skills *Blender 2.8 Game Character Creation* Darrin Lile,2019 Learn to create game characters with Blender 2.8 and Unity About This Video Animate a 2D face with Grease Pencil Create animation cycles for a video game Export characters and animations from Blender 2.8 to Unity Develop C script in Unity to control a game character In Detail Creating game characters and bringing them to life is made easier with Blender 2.8 Explore the full spectrum of features along with useful tips and techniques through this interactive course You ll learn to create a game character export it to Unity and configure it so you can control it in the game engine Beginning with modeling you ll use Blender 2.8 to build all the individual pieces of a Lego character Next you ll understand how to UV map each of the parts and then create an efficient unified UV map of the entire character You will use Blender s texture painting tools to create the character s clothes and the Sculpt tools to create high resolution details of the hair You ll then explore how to bake a normal map in Blender and apply textures to the character model As you progress you ll work on rigging the character You ll begin with a single bone and create the rig manually building the character rig from the ground up You ll then create a Foot Roll Rig and discover how to use Blender 2.8 s new process for creating custom shapes to control the character Once the rig is complete the course will introduce you to an exciting technique using Blender 2.8 s new Grease Pencil tools to animate both a 2D drawn face and a 3D body at the same time With this technique you ll be able to develop the character s Idle Run and Jump animations ready for use in a game engine From exporting the character animations and textures out of Blender through to bringing them into the Unity game engine you ll be able to learn systematically In addition to this you will get to grips with setting up the character in the game and retargeting third party animations on to your character using Unity s Humanoid Rig system Finally you will write C script to

incorporate your 2D and 3D animations and get the character running around the level By the end of this course you will have developed the skills you need to create interesting game characters with Blender 2.8 Downloading the example code for this course You can download the example code files for this course on GitHub at the following link <https://github.com/PacktPublishing/Blender-2.8-Game-Character-Creation>

**Blender Character Creation for Games and Animation** Darrin Lile, 2019 Learn to use Blender to create your own 3D characters for animation and video games About This Video Build a 3D character model in Blender Bake a normal map in Blender In Detail Ever wanted to create your own 3D characters for games and animations from the first polygon through to the final rigged character This is the opportunity to build your skills by learning through an interactive and engaging course In this course you'll explore all about 3D modeling in Blender You'll begin by creating a base mesh of the character in Blender understanding how to create the head body hands and feet Next from this base mesh you will create the

character's clothes using Blender's sculpt tools to form creases and folds. You will also UV map the character in Blender and get to grips with creating a unified UV map that can be used to develop texture maps in external paint programs such as Krita. You'll even discover the technique of painting textures for hair, eyebrows, and eyelashes. The course will then guide you on how to bake a normal map in Blender to capture high-resolution sculpt details and apply them to a lower-poly model. In later sections, you will rig the character in Blender and adjust the weights so that it deforms credibly during the animation. The course will only focus on open-source software such as Blender and Krita to help you create a character that is ready for animation in Blender and ready to be imported into any 3D game engine such as Unity and Unreal. By the end of this course, you will have learned how to effectively create exciting characters in Blender for games and animations.

**Create Game Characters with Blender** Darrin Lile, 2019. Use Blender to 3D model, texture, rig, and animate your own game character. About This Video: Easily navigate the Blender interface and gain experience working with Blender's modeling tools. Learn how to texture using a pen tablet for digital painting. Understand how the instructor uses a Wacom Intuos tablet in this course. In Detail: If you want to learn how to create your own game characters in Blender 3D, this course is for you. You'll learn how to model, texture, rig, and animate a character in Blender 3D. Moreover, you'll also discover how to bring the character into Unity and set up a character controller to move it around. For over 2 decades, Blender has been widely adopted in the animation and visual effects industry thanks to its wide range of features. Blender provides an excellent, low-cost way to learn the fundamentals of 3D modeling, texturing, and rendering. In this course, you'll learn how to use Blender's retopology tools, surface tools, and the Grease Pencil to create a low-resolution version of your high-resolution sculpt. You'll bake normal and ambient occlusion maps in Blender from a hi-res sculpt to a low-poly mesh. You'll then import these texture maps into Unity and test them on your character in game. The course also takes you through some of the unique issues in UV mapping a character in Blender and guides you in using the UV mapping tools to create an organized UV map that can be exported to external paint programs like Photoshop or GIMP for texturing. You'll even explore the texture painting tools in Blender and use them to create texture maps for the character. As you advance, you'll get to grips with using the Blender Rigify add-on to create a basic rig for your game character, prepare your character for rigging, and generate the base rig. Next, you'll understand how to generate the control objects of the rig and how various controls can be used in animation. You'll then discover how you can adjust the weights of your character in Blender using vertex groups and parent the character's war hammer and shield to the rig. The course will also help you get well-versed with the basics of creating animation cycles for a game character. You'll use Blender's Graph Editor and Dope Sheet to animate the Idle and Run animations and create a Jump Pose. Finally, moving to Unity, you'll write the code to get your character running and

jumping through a test level
