#### Course Description:

A consideration of problems confronting our urban, post-industrial civilization and society. Topics may include poverty, racism, stratification and changing social roles in American and global society. Prerequisite: Introduction to Sociology (SOCI 101). *3 credits (3 lecture hours; spring semester)*

#### Course Objectives and Outcomes:

The goal of this class is to further embrace "the socio-historical perspective" that you should have gained in the Introduction to Sociology and/or American History courses. This involves *critical reflection and reaction* to the society that surrounds you and the problems that we face that stem from our social arrangements and institutions. Some of the main concepts employed in analyzing society and which we will come to understand in the class are *cultural relativism, ethnocentricity, bias, objectivity and subjectivity, conflict/critical social theory, institutional dysfunction, deviance, norms, values, and globalization*. Each student should come out of the course utilizing the sociological imagination they have cultivated during the semester in order to better understand the nature of social problems at home and abroad.

The outcomes of the course include:

- understanding sociological methods and how they can be applied to the study of social problems;
- demonstrating knowledge of specific social problems that affect society;
- demonstrating an understanding of modern globalization as it applies to social problems;
- demonstrating the ability to describe the relationship between modern society and social problems;
- comparing and contrasting competing sociological theories in the context of social problems;
- analyzing four specific social problems and identifying competing solutions for each.

Attending class, taking notes, participating, and reading the assignments on time should allow you to successfully complete the objectives of the course. Your grade will reflect the effort which you put into achieving these objectives.
