CEO Succession, Leadership, and (Dis)similarity Cristina Pratelli, 2018-12-18 CEO succession represents a challenge for many companies. The leadership style of the new CEO impacts employees' attitudes which in turn might be biased by the comparison employees make with their previous CEO. Cristina Pratelli investigates how and why leadership style dissimilarity between the predecessor and the successor develops and affects successor leadership effectiveness. After a literature review and a theoretical model, she presents results from a quantitative study with SMEs in Switzerland as well as a qualitative multiple case study with family businesses based in Germany, Italy, and Switzerland. This work offers new insights into CEO selection, leadership development, and the effectiveness of organizations. **Dissertation Abstracts**

Wiltshire, Aastha Malhotra, Micheal Axelsen, 2018-03-28 Recent decades have seen a significant transformation of the not-for-profit (NFP) sector. This includes a rise in the number of organisations and people employed, a shift from charities and philanthropic agencies to hybrid social enterprise business models, competing stakeholder interests, and increasing expectations regarding accountability and transparency. The role of NFPs has also become more complex; they not only serve the disadvantaged and fulfil social needs but also actively advocate for and implement public policies and promote social and economic inclusion. The growth and complexity has brought with it a need for innovative and entrepreneurial approaches to leadership that stems from an in-depth understanding of the changing nonprofit landscape. Addressing this need for Not for Profits and Social Enterprises will help readers navigate extant challenges by drawing on conceptual literature, both theoretical and empirical, and emphasising practical, real-world experience through case studies and vignettes. The key aim of this book is to help existing and future NFP leaders at all organisational levels to support their organisations and employees and in turn clients and communities through theoretical insights and practical approaches by focusing on transformational leadership aspects for contemporary Not for Profits. *Not for Profits and Social Enterprises* is key reading for researchers, academics, and policy makers in the areas of Non-profit Management, Leadership, Public Sector Management, and Charity Management, as well as related disciplines such as Philanthropy and Social Entrepreneurship. The scope of the Application papers has expanded over recent years to cover not just innovative applications using traditional knowledge-based systems but also to include applications demonstrating the whole range of AI technologies. This volume contains thirteen refereed papers describing deployed applications or emerging applications, together with an invited keynote paper by Dr Daniel Clancy of NASA Ames Research Centre. The papers were subject to refereeing by at least two

expert referees All papers which were controversial for some reason were discussed in depth by the Application Programme Committee For the application stream a paper is acceptable even if it describes a system which has not yet been installed provided the application is original and the paper discusses the kinds of things that would help others needing to solve a similar problem Papers have been selected to highlight critical areas of success and failure and to present the benefits and lessons learnt to other developers Papers this year cover topics as diverse as KBS for maintaining offshore platforms Data Mining to predict corporate business failure integrated AI techniques to support field service engineers Natural Language applied to the Data Protection Act knowledge management and the application of neural networks
