## **Biomedical Ethics A Canadian Focus Second Edition :**

**Biomedical Ethics** Johnna Fisher, 2013 *Biomedical Ethics A Canadian Focus* second edition is an anthology of classic and contemporary readings designed to introduce students to the main debates and issues faced by practitioners in the medical professions. The book is organized into nine chapters. Each chapter includes an introduction followed by a selection of articles, many of which explore ethical issues specific to the Canadian health care system. The readings are supported by end of chapter case studies covering the issues highlighted in the articles, study questions, suggested further readings, and an appendix illustrating how to provide case commentary on an ethical issue.

**Readings in Biomedical Ethics** Eike-Henner W. Kluge, 1993 *Bioethics* Peter A. Clark, 2016-12-29 The main strength of this book is that it examines the challenges facing the field of Bioethics today from medical, ethical, and legal perspectives. A critical exchange of ideas from professionals in interdisciplinary fields allows everyone to learn and benefit from the insights gained through others' experiences. Examining, analyzing, and understanding these complex medical, ethical, legal issues and cases and how they are resolved will serve as a paradigm for all professionals who will be confronted with these complex bioethical issues now and in the future. The more we face these challenges, directly examine them critically, and debate them enthusiastically, the more knowledge will be gained, and hopefully we will gain more practical wisdom.

**Readings in Biomedical Ethics** Eike-Henner W. Kluge, 2013-04-01 *A Cross-Cultural Dialogue on Health Care Ethics* Harold Coward, Pinit Ratanakul, 2006-01-01 The ethical theories employed in health care today assume in the main a modern Western philosophical framework. Yet the diversity of cultural and religious assumptions regarding human nature, health and illness, life and death, and the status of the individual suggest that a cross-cultural study of health care ethics is needed. *A Cross-Cultural Dialogue on Health Care Ethics* provides this study. It shows that ethical questions can be resolved by examining the ethical principles present in each culture, critically assessing each value, and identifying common values found within all traditions. It encourages the development of global awareness and sensitivity to and respect for the diversity of peoples and their values and will advance understanding as well as help to foster a greater balance and a fuller truth in consideration of the human condition and what makes for health and wholeness.

**Pragmatism and Objectivity** Sami Pihlström, 2017-02-17 *Pragmatism and Objectivity* illuminates the nature of contemporary pragmatism against the background of Rescher's work, resulting in a stronger grasp of the prospects and promises of this philosophical movement. The central insight of pragmatism is that we must start from where we find ourselves and deflate metaphysical theories of truth in favor of an account that reflects our actual practices of the concept. Pragmatism links truth and rationality to experience, success, and action. While crude versions of pragmatism state that truth is whatever works for a person or a community, Nicholas Rescher has been at the forefront of arguing for a more sophisticated pragmatist position. According to his position, we can illuminate a robust concept of truth by considering its links with inquiry, assertion, belief, and action. His brand of pragmatism is objective and organized around truth and inquiry.

rather than other forms of pragmatism that are more subjective and lenient The contingency and fallibility of knowledge and belief formation does not mean that our beliefs are simply what our community decides or that truth and objectivity are spurious notions Rescher offers the best chance of understanding how it is that beliefs can be the products of human inquiry yet aim at the truth nonetheless The essays in this volume written by established and up and coming scholars of pragmatism touch on themes related to epistemology philosophy of mind philosophy of science and ethics **Crítica** ,2001
