

## IMPORTANT

### HOT BLENDING INSTRUCTIONS

To minimize the possibility of scalding when blending hot materials, the following precautions and procedures must be observed:

- 1) If you are using the standard two-piece container lid that originally came with your blender, limit the amount of material processed to 1/2 pint.

**NOTE:** A special accessory lid assembly is available for use with stainless steel containers only, which allows safe processing of larger loads.

Order 1-Quart Hot Blending Lid, Catalog No. CAC14.

- 2) If you are using the standard two-piece container lid, completely remove the center portion of the lid before turning blender on. This will allow venting of the rapidly heated and expanding air present inside container when blender is running.

If you are using the special accessory lid, follow the instructions packed with the lid; venting will be accomplished automatically.

- 3) Always start blending on lowest speed setting, then progress to desired speed.
- 4) Never stand directly over blender when it is being started or while running.
