Chern on Dispute Boards Cyril Chern, 2015-05-22 Chern on Dispute Boards examines the law of dispute boards and their development internationally while also covering procedural topics that are of particular concern to those utilising dispute boards It deals with advanced practitioner issues in the emerging law of dispute boards on an international scale laying out their methods and methodology not only under the common law but also under other legal systems such as Civil law and Shari ah law Excelling in describing the how and why this book also gives samples and or forms of actual working dispute boards that any practitioner could use and adapt to their own needs Readers of this this updated third edition will have explained to them the various international formats and types of dispute boards in use today and be brought up to date on the ever evolving law within the field New to this 3rd edition is the extensive coverage of appeals from Dispute Board Decisions the laws relative to appeals and the ICC enforcement procedures and new forms and guidelines for the practitioner This book guides the reader through the complexities of actual commercial and construction disputes and their successful resolution and also presents a way forward for the dispute board members themselves to administer actual dispute boards all over the world It is therefore the number one guide for construction lawyers engineers and dispute board stakeholders worldwide *The Difficult Construction of European Banking Union* David Howarth, Joachim Schild, 2020-06-29 The Difficult Construction of European Banking Union examines the political legal and economic issues surrounding the lacunae and design faults of European Banking Union and its problematic operation The volume brings together the work of sixteen scholars focused on the diverse debates surrounding the construction and operation of Banking Union BU and its necessary reform BU represents one of the most important developments in European integration since the launch of Monetary Union Furthermore the design of the BU agreed between 2012 and 2014 was a messy compromise among EU member states It is not surprising then that BU has sparked a lively academic debate and triggered an ever growing number of publications from different disciplinary backgrounds The first wave of academic work on BU focuses upon the economic rationale underpinning the supranationalisation of control over banking regulation supervision support and resolution and the political dynamics and

legal issues that shaped the design of the Union agreed This volume is located at the intersection of this first phase of academic research and a second stage which analyses the functioning of the different elements of BU New research questions are triggered by the albeit limited empirical evidence on BU s implementation and operation Contributions to this second wave of research attempt to identify potentially dangerous lacunae and contribute to on going reform debates The Difficult Construction of European Banking Union will be of great interest to scholars of the European Union Banking Economic Governance and Political Economy Most of the chapters were originally published as three special issues in the Journal of Economic Policy Reform

Making Spaces through Infrastructure Marian Burchardt, Dirk Laak, 2023-07-04 Infrastructures are fundamental means through which societies create spaces but little is known about the precise ways in which this occurs How have infrastructures animated certain understandings of space How do infrastructures stabilize or undermine the spatial formats in which we live which shape our everyday practices and which regulate access to services and resources And conversely how do spaces frame the ways infrastructural provision is organized How do existing spaces shape infrastructural development and the scope and forms of access to vital services such as transport and water In this volume historians and sociologists draw on a range of fascinating case studies and provide compelling answers to these questions Exploring among others the provision of irrigation water in nineteenth century Los Angeles the invention of airport transit zones and the infrastructural practices of homeless people in Berlin the book demonstrates how the making of spaces through infrastructure is deeply political Intent on revealing uneven geographies of provision and hierarchies of access the contributors highlight how infrastructures are products of global entanglements
