Critical Discourse Analysis and Discourse of Power Anwar Elsharkawy, 2017-01-02 Scientific Essay from the year 2012 in the subject Speech Science Linguistics grade Excellent with honor course Critical Discourse Analysis language English abstract The present paper has shown the practical part of CDA according to three scholars namely they are Norman Fairclough Ruth Wodak and Teun van Dijk Their approaches are somehow different in method and way of interpretation While Fairclough is brought up on the systemic functional model of theory and thus often concentrates on rather limited amounts of research material Wodak turns to sociolinguistics and ethnography with an emphasis on corpus based research and on work with different approaches with a variety of empirical data as well as background information However the notion that language is inherently social remains a key assumption in both approaches On the other hand similarly to Fairclough van Dijk acknowledges three different perspectives text discourse practice and sociocultural practice and emphasizes on the link between textual analysis and sociocultural analysis However van Dijk differentiates himself from both Fairclough and Wodak in his understanding of social events or of social institutions and power relations To van Dijk social cognitions mediate between micro and macro levels of society between discourse and action between the individual and the

group Therefore the focus on social cognition governs the process of analysis *Discourse and Practice* Theo van Leeuwen,2008-05-01 Adding a new introduction and two previously unpublished papers *Discourse and Practice New Tools for Critical Discourse Analysis* brings together van Leeuwen's methodological work on discourse analysis of the last 15 years *Discourse* van Leeuwen argues is a resource for representation a knowledge about some aspect of reality which can be drawn upon when that aspect of reality has to be represented a framework for making sense of things And they are plural There can be different discourses different ways of making sense of the same aspect of reality that serve different interests and will therefore be used in different social contexts However abstract some discourses are discourses ultimately always represent doings van Leeuwen argues Doing is the foundation of knowing and social practices are the foundation of discourses Studying children's books newspaper reports brochures and other texts as well as photographs and children's toys van Leeuwen investigates what can happen when practices are transformed into discourses and provides analytical tools for reconstructing discourses from texts Throughout the book van Leeuwen makes connections between sociological and linguistic or semiotic concepts and methods to ensure the social and critical relevance of his analytical categories van Leeuwen's work has already been widely used by critical discourse analysts across the world This volume will be a welcome guide for anyone looking for a form of discourse analysis that is both explicit and methodical and critically incisive
