Group Work Bradley T. Erford, 2018-04-17

The overriding theme of *Group Work: Processes and Applications* is a focus on the specialized group work that counselors perform from a systemic perspective in a multicultural context. This text briefly covers traditional theoretical approaches focusing more on the techniques and applications of the approaches, but the core of the text involves the systemic approach to group work, preparing group leaders to facilitate the systemic group process from planning the group through the four stages of group work: forming and orienting, transition, working, and termination. The content is aligned with 2016 CACREP standards. Numerous other techniques covered are linked with specific theoretical orientations. PowerPoints and Instructor's manual are on the way and should be available in the next 2-3 months.

Bundle Gerald Corey, 2014

Incorporating the thinking, feeling, and behaving dimensions of human experience, the ninth edition of Corey's best-selling text offers an easy-to-understand text that helps you compare and contrast the therapeutic models expressed in counseling theories. Corey introduces you to the major theories: psychoanalytic, Adlerian, existential, person-centered, Gestalt, reality, behavior, cognitive-behavior, family systems, feminist, and postmodern approaches, and demonstrates how each theory can be applied to a single case. Stan, with his trademark style, shows you how to apply those theories in practice and helps you learn to integrate the theories into an individualized counseling style. This book is the center of a suite of products that includes the Student Manual, *Case Approach to Counseling and Psychotherapy* 2013, *The Art of Integrative Counseling* 2013.
