The Drivers and Impediments for Cross-border E-commerce in the EU. , 2013. There are no official statistics on international online trade in goods so far. This paper uses a consumer survey to construct a unique matrix of online B2C domestic and cross-border trade in goods between the 27 EU Member States. We compare online and offline trade patterns for similar goods. We find that the standard gravity model performs well in explaining online cross-border trade flows. The model confirms the strong reduction in geographical distance-related trade costs compared to offline trade. However, the trade costs associated with crossing language barriers increase when moving from offline to online trade. Institutional variables such as the quality of

legal institutions online payments facilities and costefficiency of parcel delivery systems might play a role in cross border trade but they remain statistically insignificant in this dataset In a linguistically segmented market like the EU online home market bias remains high compared to bias in offline cross border trade We conclude that it is hard to predict at this stage whether regulators could boost online cross border trade through improvements in legal and financial systems and parcel delivery infrastructure

Drug Violence, the Peso, and Northern Border Retail Activity in Mexico Thomas M. Fullerton (Jr.),Adam G. Walke,2015 Exchange rate fluctuations and international business cycles may acutely affect retail sales in border regions where residents have the option of shopping in the neighboring country This study examines the determinants of retail sales in six cities located along Mexico s northern border Retail activity in these cities is found to increase in tandem with real depreciations of the peso lower unemployment rates in neighboring US countries and increased border crossings Taken together these results suggest that cross border shopping contributes to retail activity in the northern border region of Mexico The opportunities for cross border shopping may also condition the impact of violent crime on border region retail sales In recent years northern Mexico has been deeply affected by a crime wave associated with competition among drug cartels Homicides related to organized crime are found to have a statistically significant negative impact on retail sales A surge in crime levels may stifle retail activity in affected areas as extortion and attacks force some stores to close or reduce operating schedules at the same time that some potential customers elect to shop in relatively safer districts across the international divide Page 4
