*Information Technology Network and Internet* C. T. Bhunia, 2005-12. This book is specially designed to improve the problem-solving ability and the imaginative power of students over the subjects of Information Technology Network and Internet. The conventional text and reference books ignore that fact: young minds need to be properly trained and nurtured to achieve excellency. In the book, lots of research issues are discussed pertaining to the current issues of networking. The book covers general topics of information technology, including the future trends of computing and networking networks in general, starting with protocol to wireless networking, internet technology in details, including next-generation internet, the evolution of networking, economics, benefits, transitional phases, evolution of generations of computers and communications, PCN, packet switching to ATM, cell switching, LAN, MAN, WAN, Ethernet, and its future generations. Internetworking gateways, bridges, ISDN, XDSL, and applications are discussed. TCP, IP, UDP, ICMP, ARP, RARP, IPv6, firewall, and exercises are dealt with. Problems and exercises on the future network will face three major challenges: high data rate, reliable transport, and secured transport. Two exclusive chapters deal with reliable transport (basically error control) and secured transport. The details analysis of BEC techniques, including those of basic ARQs and several new and modified approaches, are extensively discussed. Many research directions are examined. The conventional security techniques, namely coding schemes, key transport, protocol key distribution, protocols, one-time key, pad, DES, AES, and MD, etc., are thoroughly discussed. In the book, the future research areas of secured techniques are explored with possible solutions. A chapter on successor of IR, now believed as knowledge technology, has been referred to. In fact, in every chapter, some research issues are mentioned with judicious selection and approaches. The book is aimed to benefit B.Tech and M.Tech students of computer science, engineering, electronics, communication engineering, information technology, and electrical engineering.
