

CHAPTER-BY-CHAPTER ANSWER KEY

CHAPTER 1

ANSWERS FOR THE MULTIPLE CHOICE QUESTIONS

1. **b** The sociological perspective is an approach to understanding human behavior by placing it within its broader social context. (4)
2. **d** Sociologists consider occupation, income, education, gender, age, and race as dimensions of social location. (4)
3. **d** All three statements reflect ways in which the social sciences are like the natural sciences. Both attempt to study and understand their subjects objectively; both attempt to uncover the relationships that create order in their respective worlds through controlled observation; and both are divided into many specialized fields. (5-7)
4. **c** Generalization is one of the goals of scientific inquiry. It involves going beyond individual cases by making statements that apply to broader groups or situations. (7)
5. **b** The Industrial Revolution, imperialism, and the development of the scientific method all contributed to the development of sociology. The fourth influence was the political revolutions in America and France — there was no political revolution in Britain at that time. (8-9)
6. **d** Positivism is the application of the scientific approach to the social world. (9)
7. **d** Of the four statements, the one that *best* reflects Herbert Spencer's views on charity is "The poor are the weakest members of society and if society intervenes to help them, it is interrupting the natural process of social evolution." While many contemporaries of Spencer's were appalled by his views, the wealthy industrialists found them attractive. (10)
8. **b** The proletariat is the large group of workers who are exploited by the small group of capitalists who own the means of production, according to Karl Marx. (11)
9. **a** Durkheim believed that social factors, patterns of behavior that characterize a social group, explain many types of behavior, including suicide rates. (12)
10. **b** In his research on suicide rates, Durkheim found that individuals' integration into their social groups influences the overall patterns of suicide between groups. He called this concept *social integration*. (12)
11. **a** In response to the development of the new, impersonal industrial society, Durkheim suggested that new social groups be created to stand between the state and the family. He believed this would address the condition of anomie. (12)
12. **c** Max Weber's research on the rise of capitalism identified religious beliefs as the key. (13)
13. **d** All are correct. Replication helps researchers overcome distortions that values can cause, results can be compared when a study is repeated, and replication involves the repetition of a study by other researchers. (14)
14. **c** Social facts and *Verstehen* go hand-in-hand. Social facts are patterns of behavior that characterize a social group. By applying *Verstehen*, your understanding of what it means to be human and to face various situations in life, you gain an understanding of people's behavior. (15)
15. **b** In the nineteenth century, it was unlikely that women would study sociology because gender roles were rigidly defined; women were supposed to devote themselves to the four K's — *Kirche, K chen, Kinder, und Kleider* (church, cooking, children, and clothes). (16-17)
16. **b** The statement that, "Unlike the situation in Europe, many North American women found that there were few barriers and they were able to train in sociology and receive faculty appointments," is *incorrect*. In the early years of sociology, the situation of women in North America was similar to that of European women — they were largely
