The 8th International Conference on Advanced Machine Learning and Technologies and Applications (AMLTA2022) About Ella Hassanien, Rawya Y. Rizk, Václav Snášel, Rehab F. Abdel-Kader, 2022-04-16 This book constitutes the refereed proceedings of the 8th International Conference on Advanced Machine Learning Technologies and Applications AMLTA 2022 held in Cairo Egypt during May 5-7 2022. The 8th edition of AMLTA will be organized by the Scientific Research Group in Egypt (SRGE) Egypt collaborating with Port Said University Egypt and VSB Technical University of Ostrava Czech Republic. The AMLTA series aims to become the premier international conference for an in-depth discussion on the most up-to-date and innovative ideas, research projects, and practices in the field of machine learning technologies and their applications. The book covers current research on advanced machine learning technology, including deep learning, sentiment analysis, cyber-physical systems, IoT, and smart cities, informatics, and AI against COVID-19, data mining, power and control systems, business intelligence, social media, digital transformation, and smart systems.

Education Reimagined: The Impact of Advanced Technologies on Learning

Mohammad Khalil, Mohammed Saqr, Sonsoles López-Pernas, Isabel Hilliger, 2024-12-18 The last decade has seen significant progress in technology, particularly in the fields of Artificial Intelligence and machine learning, which have had a profound impact on numerous industries, including education. The integration of technology in education has fundamentally altered the landscape of learning, where data becomes a crucial component to provide insights into, for example, how students learn, when and where additional support is needed. Employing educational data is proving to be a catalyst for innovation in education, opening up new possibilities for students and educators alike. The focus of this Research Topic is to explore the impact of recent technological innovations and advances, such as AI-powered chatbots, learning analytics, virtual and augmented reality, and remote and virtual labs, on different education systems, both from the educational and the psychological perspective. The scope is twofold: on the one hand, examining the use of these advanced technologies in learning and teaching activities; and on the other hand, teaching students about these technologies and understanding the impact of including them in new education policies and curricula, including teaching of AI, data science, analytics, and the ethical implications of data. The Research Topic seeks to provide insightful and thought-provoking perspectives on how technology is being utilized to enhance the learning experience for students of all ages, both in higher education and K-12 education, and their transition to higher education. By gathering experts in psychology, education, and technology, this Research Topic aims to present research findings and best practices and to stimulate discussions on the role of technology in shaping the future of education. The ultimate objective is to inspire innovation and to improve the education of future generations through advanced technologies.

Exploring Psychology, Social Innovation and Advanced Applications of Machine Learning

Raygoza-L., Maria E., Orduño-Osuna, Jesus Heriberto, Mercado-Herrera, Abelardo, Jimenez-Sanchez, Roxana, Murrieta-Rico, Fabian N., 2025-03-06 Machine learning ML

algorithms can be used to better understand human behavior in its various developmental stages and to assist in addressing psychological issues. Additionally, in the realm of mental health and well-being, algorithms can assist with early detection of disorders and customization of treatments, as well as personalize recommendations and suggestions based on user behavior. By focusing on user experience and usability, ML may be used to address challenges faced by private enterprises and social issues.

Exploring Psychology: Social Innovation and Advanced Applications of Machine Learning explores the relationships between human psychology and machine learning technology, enabling researchers to delve into areas such as user interface design, ethics in artificial intelligence, and the social impact of algorithms. Furthermore, it promotes interdisciplinary collaboration by bringing together perspectives from different fields, which could stimulate new research and innovative approaches in the field of machine learning. Covering topics such as industrial processes, digital therapy, and machine vision, this book is an excellent resource for psychologists, computer scientists, engineers, healthcare practitioners, educators, business leaders, policymakers, professionals, researchers, scholars, academicians, and more.

Advanced Tools for Technology Transfer in Transportation C. E. Bland, 1997 IEEE International Conference on Advanced Learning Technologies IEEE Computer Society, 2001. Focusing on computational intelligence, this text covers topics on architecture of learning technology systems, advanced uses of multimedia and hypermedia, integrated learning environments, application of AI tools in learning technology, and virtual reality.
