Mathematics and Computing Methods in Complex Computational Systems WAMCM 2022 [Handbook of Research on Economic and Social Well-Being](#) Conchita D'Ambrosio,2018-03-30 The past decade has been characterized by a burgeoning interest in new concepts of individual and social well being The impetus for this new research has stemmed from increased demand from policy makers and civil society for measures of progress that go beyond the traditional measures of GDP as well as improved datasets allowing individuals and households to be tracked over their life course The aim of this Handbook is to chart these developments and provide extensive surveys of many of the recent themes that have emerged in the research literature Some of the topics addressed include poverty relative deprivation and satisfaction economic insecurity social exclusion and inequality income and social polarization and social fractionalization and diversity Each topic is first analyzed from a theoretical perspective followed by detailed empirical discussion [The Blue Compendium](#) Jane Lubchenco,Peter M. Haugan,2023-05-24 Home to over 80 percent of all life on Earth the ocean is the world s largest carbon sink and a key source of food and economic security for billions of people The relevance of the ocean for humanity s future is undisputed However the ocean s great potential to drive economic growth and equitable job creation sustain healthy ecosystems and mitigate climate change is not yet fully recognised Lack of awareness of this potential as well as management and governance challenges pose impediments Until these impediments are removed ocean ecosystems will continue to be degraded and opportunities for people lost A transition and a clear path to a thriving and vibrant relationship between humans and the ocean are urgently needed This open access collection of papers and reports identifies a path that is inspired by science energised by engaged people and emboldened by visionary leaders These assessments of knowledge are commissioned by the High Level Panel for a Sustainable Ocean Economy Ocean Panel which was established in September 2018 as a unique initiative led by heads of state and government from around the world to showcase the latest leading edge science knowledge and state of the art thinking on key ocean issues Altogether The Blue Compendium offers innovative ocean solutions in technology policy governance and finance realms that could help accelerate a transition to a more sustainable and prosperous relationship with the ocean The comprehensive assessments have already informed policy making at the highest levels of government and motivated an impressive array of responsive and ambitious action across a growing network of leaders in business finance and civil society [OECD Observer](#) Organisation for Economic Co-operation and Development,2011 [Measuring Welfare beyond Economics](#) Claudio O. Delang,Yi Hang Yu,2015-06-26 Dissatisfaction with the Gross Domestic Product GDP as an indicator of a country s development or a population s wellbeing led to the development of the Genuine Progress Indicator GPI The GPI is an aggregate index of over 20 economic social and environmental indicators and accounts for both the welfare benefits of economic growth and the social and environmental costs which accompany that economic growth The result is better information about the level of welfare or well being of a country s population This book measures the GPI of Hong Kong and Singapore from 1968 to 2010 It finds that for both

countries economic output as measured by the GDP has grown more than welfare as measured by the GPI but important differences are also found In Hong Kong the GPI has grown for the whole period under consideration while in Singapore the GPI has stalled from 1993 This is in line with most countries and is explained by the threshold hypothesis which states that beyond a certain level of economic development the benefits of further economic growth are outweighed by even higher environmental and social costs The book argues that the growth of Hong Kong s GPI is due to its favourable relationship with China and in particular its ability to export low wage jobs and polluting industries rather than successful domestic policies A stalling or shrinking GPI calls for alternative policies than the growth economy promoted by neoclassical economists and the book explores an alternative model that of the Steady State Economy SSE

*For Good Measure* Joseph E. Stiglitz,2019-11-19 Today s leading economists weigh in with a new dashboard of metrics for measuring our economic and social health What we measure affects what we do If we focus only on material well being on say the production of goods rather than on health education and the environment we become distorted in the same way that these measures are distorted Joseph E Stiglitz A consensus has emerged among key experts that our conventional economic measures are out of sync with how most people live their lives GDP they argue is a poor and outmoded measure of our well being The global movement to move beyond GDP has attracted some of the world s leading economists statisticians and social thinkers who have worked collectively to articulate new approaches to measuring economic well being and social progress In the decade since the 2008 economic crisis these experts have come together to determine what indicators can actually tell us about people s lives In the first book

of its kind leading economists from around the world including Thomas Piketty Emmanuel Saez Elizabeth Beasley Jacob Hacker Francois Bourguignon Nora Lustig Alan B Krueger and Joseph E Stiglitz describe a range of fascinating metrics from economic insecurity and environmental sustainability to inequality of opportunity and levels of trust and resilience that can be used to supplement the simplistic measure of gross domestic product providing a far more nuanced and accurate account of societal health and well being This groundbreaking volume is sure to provide a major source of ideas and inspiration for one of the most important intellectual movements of our time
