students with the details of Java's Abstract Windowing Toolkit (AWT). To overcome this dilemma, the text comes with a software package, BreezySwingO, which simplifies the programming of GUIs. BreezySwing insulates students from the complex details of laying out window components and responding to interface events. Lambert and Osborne's book and software package enable students to enjoy the excitement of writing GUI-based programs without being overwhelmed by or distracted from the more basic issues of algorithm design and the factoring of programs into classes. The University Edition of Borland's JBuilder 4 is packaged with the text.
