**New Cosmetic Science** T. Mitsui, 1997-06-19 Cosmetic science covers the fields from natural sciences to human and social sciences and is an important interdisciplinary element in various scientific disciplines. New Cosmetic Science is a completely updated comprehensive review of its 35 year old counterpart Cosmetic Science. New Cosmetic Science has been written to give as many people as possible a better understanding of the subject from scientists and technologists specializing in cosmetic research and manufacturing to students of cosmetic science and people with a wide range of interests concerning cosmetics. The relationship between the various disciplines comprising cosmetic science and cosmetics is described in Part I. In addition to discussing the safety of cosmetics, the Usefulness of Cosmetics rapidly becoming an important theme is described using research examples. The latest findings on cosmetic stability are presented as are databases, books and magazines increasingly used by cosmetic scientists. Part II deals with cosmetics from a usage viewpoint including skin care cosmetics, makeup cosmetics, hair care cosmetics, fragrances, body cosmetics, and oral care cosmetics. Oral care cosmetics and body cosmetics are presented with product performance types, main components, prescriptions, and manufacturing methods described for each item. This excellent volume enlightens the reader not only on current cosmetics and usage but indicates future progress, enlarging the beneficial effects of cosmetics. Products with better pharmaceutical properties, cosmeceuticals working both physically and psychologically are also highlighted.

**Cosmetic Science** Kenneth Alexander, Perry Romanowski, 2026-01-01 This is the only textbook designed to provide current information in the area of cosmetic science, the various products, formulation, and new and future technologies associated with the discovery, development, and formulation of cosmetic products. The main topics are a short history of cosmetics, a review of the physiology of skin, hair, and nails, and a current discussion of cosmetic products and their usage for the skin, hair, nails, eye, personal care products for women, baby products, products utilized by and for men, perfumes, colognes, toilet waters, and other aromatic products, formulation considerations for the various product forms, and newer technologies and future products for the market place. All of these topics are designed to expand upon the basic knowledge of the reader, whether they be an undergraduate, graduate, PhD, a young researcher, or an established professional. The primary market for this text is college students who have an educational background in pharmaceuticals, chemistry, biology, chemical engineering, or related field and wish to obtain employment in the cosmetic industry. It is equally essential information for industry professionals and academics.
