Bayesian Methods For Nonlinear Classification And Regression:

Bayesian Methods for Nonlinear Classification and Regression David G. T. Denison, Christopher C. Holmes, Bani K. Mallick, Adrian F. M. Smith, 2002-05-06 Nonlinear Bayesian modelling is a relatively new field but one that has seen a recent explosion of interest Nonlinear models offer more flexibility than those with linear assumptions and their implementation has now become much easier due to increases in computational power Bayesian methods allow for the incorporation of prior information allowing the user to make coherent inference Bayesian Methods for Nonlinear Classification and Regression is the first book to bring together in a consistent statistical framework the ideas of nonlinear modelling and Bayesian methods Focuses on the problems of classification and regression using flexible data driven approaches Demonstrates how Bayesian ideas can be used to improve existing statistical methods Includes coverage of Bayesian additive models decision trees nearest neighbour wavelets regression splines and neural networks Emphasis is placed on sound implementation of nonlinear models Discusses medical spatial and economic applications Includes problems at the end of most of the chapters Supported by a web site featuring implementation code and data sets Primarily of interest to researchers of nonlinear statistical modelling the book will also be suitable for graduate students of statistics The book will benefit researchers involved in regression and classification modelling from electrical engineering economics machine learning and computer science

reviewed contributions to the fifth Bayesian Young Statisticians Meeting BaYSM 2021 held virtually due to the COVID 19 pandemic on 13 September 2021. Despite all the challenges of an online conference, the meeting provided a valuable opportunity for early career researchers including MSc students, PhD students, and postdocs to connect with the broader Bayesian community. The proceedings highlight many different topics in Bayesian statistics, presenting promising methodological approaches to address important challenges in a variety of applications. The book is intended for a broad audience of people interested in statistics and provides a series of stimulating contributions on theoretical, methodological, and computational aspects of Bayesian statistics.

Bayesian Thinking, Modeling and Computation

, 2005-11-29. This volume describes how to develop Bayesian thinking, modelling, and computation, both from philosophical, methodological, and application points of view. It further describes parametric and nonparametric Bayesian methods for modelling and how to use modern computational methods to summarize inferences using simulation. The book covers a wide range of topics, including objective and subjective Bayesian inferences, with a variety of applications in modelling, categorical survival, spatial, spatiotemporal, epidemiological, software reliability, small area, and micro array data. The book concludes with a chapter on how to teach Bayesian thoughts to nonstatisticians, critical thinking on causal effects, objective Bayesian philosophy, nonparametric Bayesian methodology, simulation-based computing techniques, bioinformatics, and biostatistics.
