The Muddling of Modern Friendships

We live in challenging times. Feelings of loneliness, isolation and disconnection rose sharply during the pandemic, leading to a significant increase in mental health issues, and all too often the blame is placed firmly at social media's door. But maybe traditional notions of friendship need to now be re-evaluated in this post-Covid and internet-driven world? We all use it, so is it maybe time to stop blaming social media, and start thinking more about how we can use it to positively influence our friendships?

Much of the prejudice against online friendships, mainly directed at the rise in the use of social media, tends to come from generations who have not grown up with the internet and who have not experienced it like our generation has. Lockdown has shown us just how important our online connections and friendships are, as without this way of keeping in touch, we all would have been truly isolated. "Online friendship" and "offline friendship" is somewhat of a false distinction: one shouldn't be seen as better than the other, as technology is now able to bring people together in more ways than ever before. Social media can actually help people to find friends, without the restrictions of geographical location. Friendships can be made and maintained over vast distances, and as we become more confident in the ways our online selves can emulate our offline selves, social media becomes an ever more rich and enriching platform for friendship.
