Paul, 2005 Algorithms Sequential Parallel and Distributed offers in depth coverage of traditional and current topics in sequential algorithms as well as a solid introduction to the theory of parallel and distributed algorithms In light of the emergence of modern computing environments such as parallel computers the Internet and cluster and grid computing it is important that computer science students be exposed to algorithms that exploit these technologies Berman and Paul s text will teach students how to create new algorithms or modify existing algorithms thereby enhancing students ability to think independently

[Drawing Futures](#) Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of

the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas
