

# How to use Descript

The screenshot shows the Descript software interface. On the left is a sidebar with navigation options: **Describe**, **Transcript**, **Pod**, **Clips**, **Web**, **Com**, and **Selection**. The main workspace is divided into two sections. The top section displays a transcript with the text "Transcribed a edited text" highlighted in a red box. Below the transcript is a blue audio waveform. A second red box highlights a portion of the waveform with the text "Use this to edit video or collect audio and directly edit." Below the waveform, there is a text block that reads: "The transcript in Descript Transcribes audio into text so you can edit video directly from the text editor. It also allows you to edit audio directly without leaving the software." The bottom section shows another audio waveform.

An AI Noise Reduction panel with a dark background and a white "AI" logo. Below the logo, the text "Noise Reduction" is displayed. There are additional controls for "Weight" and "Sensitivity" with a "Reset" button.

A settings panel for the "Descript" application. It includes a "Describe" toggle, a "Schedule" toggle, and a "Voice features" section. Under "Voice features", there are three sliders: "Pano", "Voice", and "Noise", each with a checkmark to its right.
