events and other alternative consumption means and spaces or less obvious intermediaries in the fashion market Although the issue of sustainable fashion has been noticed in the academic discourse in Poland it is yet to be examined bringing together the production and consumption side of the issue Nor has the spatial dimension of fashion market transformation in Poland been analysed in detail Taking a geographic perspective this book fills this research gap by presenting a holistic approach to the fashion market including design production and consumption of fashion considering the social cultural and spatial dimensions of the matter and diverse stakeholders who participate in it Providing a comprehensive analysis of long term changes in the Polish fashion market the book addresses several interesting issues These include the extent to which the sustainable reorientation of the fashion market accompanies the broader processes of adaptation restructuring and upgrading of the textile and clothing sector how it fits into the broader logic of culturalisation of clothing production and commercialisation of design as an applied artistic genre and a part of the creative sector and to what extent it is connected with new alternative consumption patterns with respect to channels places and spaces of clothing purchases and re use The main premise of the book is that although it is still a relatively small part of the fashion market in Poland sustainable fashion design production and consumption is an increasingly important phenomenon with significant social economic and spatial implications The book therefore argues that sustainable design and production constitute a promising opportunity for adaptation restructuring and upgrading of the textile and clothing sector in the European semi periphery Using the metaphor of the fashion ecosystem it also illustrates how sustainable fashion practices contribute to the creation of new links and networks within the fashion industry alongside a more fragmented domestic production structure Chapter 1 and 9 are licensed under the terms of the Creative Commons Attribution 4 0 International License a href <http://creativecommons.org/licenses/by/4.0/> For further details see license information in the chapters
