

# Software Project Test Plan

Project: ADS – Ambulance Dispatch System

## Purpose

The purpose of this document is to outline the test strategy and overall test approach for the ADS project. This includes test methodologies, traceability, resources required, and estimated schedule.

## Audience

The audience of this document is the project team and the project management team. This document is also written for the extended test team. The test lead, testers, and any outsourced testers should be able to utilize this document to understand the scope of work that must be accomplished by the test team. The document is intended to accomplish its purpose only for the intended audiences.

### Revision History

Revision	Date	Updated By	Update Comments

0.2	2007.07.20	Scot Robinson	First Draft
0.3	2007.07.21	Scot Robinson	Ready for Review
0.4	2007.07.22	Scot Robinson	Final Revisions

## 1. Introduction

This section describes the objectives and extent of the tests. The goal is to provide a framework that can be used by managers and testers to plan and execute the necessary tests in a timely and cost-effective manner.

### 1.1 Test objectives

The objective of the test suite is to provide adequate coverage metrics, requirements validation, and system quality data such that sufficient data is provided for those making the decision to release.

### 1.2 Extent of tests

The tests referenced herein are written to validate use cases, requirements (both functional and non-functional), system architecture, and object design. The structured tests for object design will be run first as the components of the system are developed. The structured tests to validate the system architecture will be run next as the system is integrated in bottom-up fashion during integration test.

## 2. Relationship to other documents

This section explains the relationship of the test plan to the other documents produced during the development effort such as the RAD, SDD, and ODD (Object Design Document). It explains how all the tests are related to the functional and nonfunctional requirements, as well as to the system design stated in the respective documents. If necessary, this section introduces a naming scheme to establish the correspondence between requirements and tests.
