Risk Models and Their Estimation Stephen G. Kellison,Richard L. London,2011 Much of actuarial science deals with the analysis and management of financial risk In this text we address the topic of loss models traditionally called risk theory by actuaries including the estimation of such models from sample data The theory of survival models is addressed in other texts including the ACTEX work entitled Models for Quantifying Risk which might be considered a companion text to this one In Risk Models and Their Estimation we consider as well the estimation of survival models in both tabular and parametric form from sample data This text is a valuable reference for those preparing for Exam C of the Society of Actuaries and Exam 4 of the Casualty Actuarial Society A separate solutions manual with detailed solutions to the text exercises is also available

Corporate Financial Analysis Diana R. Harrington,2004 This paperback text emphasizes the financial concepts and tools essential for understanding the financial impacts of business decisions The author uses current examples of actual business situations to demonstrate how financial tools concepts and theories can be used by managers to improve decision making and enhance business performance The text has a global emphasis with an equal number of domestic and international examples The author includes a discussion of international financial statements and the financial impacts of changes in foreign exchange rates The book s major appeal is its direct concise and no nonsense approach to understanding both the basics of finance and current financial concepts which allows even non financial managers to understand financial analysis
