Ministry of Education ... Statistical Yearbook ,2016

Education in the Global City Aaron Koh, Terence Chong,2017-10-02 Education in the Global City examines education in Singapore through the critical lens of manufacturing The book brings together two disparate fields which inform each other education and the global city and the book s contributors analyse and critique the manufacturing of Singapore education and Singapore s global city formation The collection covers vocational education language policies Higher Education English education critical thinking sex education creativity and critical feminist scholarship Collectively the book pries open the ideology of the

manufacturing education system and points out the tension between the nation and its ideologies and the global city aspirations. It also asks how education contributes to and is shaped by the market realities of Singapore's global city ambitions which are at odds with the nationalistic local agenda and priorities of nation building. In interrupting and speaking against the prevailing and narrow manufacturing of education for a teleological end in spite of Singapore's successful nation building, this book is an important contribution to critical education scholarship. This book was originally published as a special issue of *Discourse Studies in the Cultural Politics of Education*. **Moving Beyond Grades to Purposeful Learning**

David Wei Loong Hung, 2023-09-14. This book explores future directions in Singaporean education as it moves beyond its historically formative goals of survival, efficiency, and performance and its emphasis on grades and formal credentialing. It examines the future of education via the 4Life framework, a four-form model for purposeful learning centered around social, emotional, regulation, and the well-being of the individual learner. Life-long learning: the learning that occurs over a learner's lifespan. Life-deep learning: a deep understanding of learned content and adaptive expertise. Life-wide learning: learning in multiple contexts besides the school environment. Life-wise learning: learning which focuses on the learner's values, morals, character, and historical empathy. This book also illustrates how purposeful learning serves to equip learners with the knowledge, skills, dispositions, and competencies they need to thrive as adaptive workers in the economy of the future. North Dakota, 1913. *Education in Singapore* Yew-Jin Lee, 2022-04-06. This edited book is a comprehensive resource for understanding the history as well as the current status of educational practices in Singapore. It is a one-stop reference guide to education and educational issues. There are three sections. Part 1 provides a sectorial overview of how education has been organized in this country, such as preschool, special needs, primary and secondary, and adult education divisions. In Part 2, contributors critically delve into issues and policies that are pertinent to understanding education here, such as underachievement, leadership, language, education assessment, and meritocracy, to question what Part 1 might have taken for granted. Part 3 contains the largest number of contributors because it offers a scholarly examination into specific subject histories. This section stands out because of the comparative rarity of its subject matter: history of Physical Education, Art, Music, Geography, Education, etc. in Singapore.
