Text Mining With Matlab:

   Text Mining with MATLAB® Rafael E. Banchs,2012-08-14 Text Mining with MATLAB provides a comprehensive introduction to text mining using MATLAB It s designed to help text mining practitioners as well as those with little to no experience with text mining in general familiarize themselves with MATLAB and its complex applications The first part provides an introduction to basic procedures for handling and operating with text strings Then it reviews major mathematical modeling approaches Statistical and geometrical models are also described along with main dimensionality reduction methods Finally it presents some specific applications such as document clustering classification search and terminology extraction All descriptions presented are supported with practical examples that are fully reproducible Further reading as well as additional exercises and projects are proposed at the end of each chapter for those readers interested in conducting further experimentation   Text Mining with MATLAB, 2nd Edition Rafael E. Banchs,2021 This book provides a comprehensive introduction to text mining using MATLAB   Data Analytics in Spectroscopy Joseph Dubrovkin,2024-02-06 This textbook summarizes various studies and significant materials on data analytics in spectroscopy Its rigorous mathematical basis in depth description and numerous examples of applications in chemistry and physics make this book valuable for theorists practitioners and students specializing in data processing in spectroscopy chemometrics and analytical chemistry The bibliography briefly describes hundreds of data analytics applications for solving spectroscopic tasks in industrial and research laboratories This book differs from existing brief reviews and articles on this topic in that it forms for the first time the big picture of all kinds of data analytics methods in spectroscopy The book also provides quickly reproducible computer calculations to illustrate its significant theoretical statements As such it can also serve as a practical guide to lecturers in data analytics in the broad field of spectroscopy including chemometrics and analytical chemistry

   Research Anthology on Implementing Sentiment Analysis Across Multiple Disciplines Management Association, Information Resources,2022-06-10 The rise of internet and social media usage in the past couple of decades has presented a very useful tool for many different industries and fields to utilize With much of the world s population writing their opinions on various products and services in public online forums industries can collect this data through various computational tools and methods These tools and methods however are still being perfected in both collection and implementation Sentiment analysis can be used for many different industries and for many different purposes which could better business performance and even society The Research Anthology on Implementing Sentiment Analysis Across Multiple Disciplines discusses the tools methodologies applications and implementation of sentiment analysis across various disciplines and industries such as the pharmaceutical industry government and the tourism industry It further presents emerging technologies and developments within the field of sentiment analysis and opinion mining Covering topics such as electronic word of mouth eWOM public security and user similarity this major reference work is a comprehensive resource for computer scientists IT
